

Thank you for trying CompuTime101 Time & Attendance software.
Please read the following notes to help you get full use of the demo version:

The minimum recommended system is as follows:

Pentium 3 700mhz
256 Megabytes Ram (Windows 2000)
512 Megabytes Ram (Windows XP)
1024 Megabytes Ram (Windows Vista/7)
250 Megabytes Free Hard Disk Space

Compatible Operating Systems:

Windows 2000 Service Pack 3 or higher
Windows XP (any version, 32bit/64bit)
Windows Vista (any version, 32bit/64bit)
Windows 7 (any version, 32bit/64bit)

During the CompuTime101 installation the Access 2003 Runtime program will be installed.

It is not recommended that you cancel this item unless you have the full retail version of Access 2003 already installed.

General Notes:

The default login name is Admin
The default password has been removed. Simply click Login.
All features (including optional upgrades) will be active for 30 days.

The demo version is limited to 2 employees.

All features (including optional upgrades) will be active for 30 days.
A sample employee has been added (John Smith) with punch information for the week of 6/25/2012 - 7/01/2012

You may add another sample employee, create sample punches, and try various shift rules.
