ATRx Secure PunchIn™

## BIOMETRIC FINGERPRINT TECHNOLOGY

Biometric technology at a price any business can afford.

The Acroprint ATRx Secure PunchIn, powered by Attendance Rx software, enables employees to simply "punch in" on a PC by matching their PIN number with their fingerprint. Software, upgradeable to Attendance Rx Network, would require a fingerprint unit at the necessary workstations to verify identity.

Solution is ideally suited for organizations that want to automate their time and attendance processes. Attendance Rx reports regular hours, two levels of overtime, vacation, sick/ personal, holiday, FMLA and other categories. Supervisors can approve time cards at PC, and print Time Card Reports, Hours Summary, Who's In Report as well as other reports. Track employees at a glance with the new IN/OUT Board feature.

Not only will you get accurate time records, with Attendance Rx you have the power to analyze that information as part of your personnel management program. This versatile software offers a wide range of management reports and will accommodate your holiday, overtime, shift and pay-period policies. This system eliminates the need for paper time cards and handwritten records.

- **Biometric technology eliminates costly buddy punching and provides indisputable records of employees' attendance.**

- ATRx Secure PunchIn is a complete time and attendance solution with biometric fingerprint technology.

- Biometric fingerprint verification combined with the ease of tracking employee hours with the powerful Attendance Rx software.

- Employees simply punch in on a PC by matching their PIN number with their fingerprint.

- Fingerprint reader is quick and reliable.

- Handles up to 50 employees with the option to upgrade to 100.

EVERY MINUTE COUNTS

ATTENDANCE Rx SYSTEM REQUIREMENTS
